THE BENEFITS OF I.T.S.

- 4 TOURNIQUETS BUILT-IN TO EACH GARMENT
- TOURNIQUETS ALWAYS PRESENT
- SINGLE HANDED OPERATION
- FLIP, PULL, TWIST ACTIVATION
- SAFE AND SECURE LOCK DOWN
- ACTIVATION COMPLETE IN SECONDS
- COMPLETE OCCLUSION OF BLOOD
- ABILITY TO TRAIN AND BUILD MUSCLE MEMORY
- COMBINED WEIGHT IS LESS THAN ONE TRADITIONAL TOURNIQUET
- USEFUL IN TRAINING SCENARIOS AND CAN BE ACTIVATED MULTIPLE TIMES

(I.T.S. INSIDE)

WINDLASS MECHANISM
PRESSURE PLATE
DISTRIBUTES PRESSURE EVENLY

1" STRAP WIDTH
MOST EFFECTIVE OCCLUSION

ACTIVATING THE I.T.S. SYSTEM IS SIMPLE AND FAST

THE I.T.S. SYSTEM IS DESIGNED TO BE USED OVER AND OVER AGAIN IN TRAINING

I.T.S. offers tourniquets on the proximal (femoral artery) and distal (tibial artery) with protection on both right and left legs

60% OF PREVENTABLE COMBAT DEATHS ARE FROM EXTREMITY BLEEDING AND 50-70% OF ALL COMBAT INJURIES ARE EXTREMITY WOUNDS

WHAT IS I.T.S.? The rules have changed. With the advent of body armor, the most common cause of preventable deaths in the tactical environment can be attributed to rapid loss of blood due to extremity wounds. A major artery wound can cause the victim to become unconscious within two minutes and bleed out and expire minutes later. If life saving devices like pressure cuffs or tourniquets are available the question becomes how do you locate and apply them quickly to yourself, or your team members, in these critical few seconds.

The BLACKHAWK!® Integrated Tourniquet System (I.T.S.) integrates four tourniquets in the pants and four tourniquets in the shirt. They are correctly positioned and oriented to the upper and lower extremities for immediate access under existing gear and can be operated by the wearer, a buddy, or a medic.

BLACKHAWK![®] THERMOSTATIC BASE-LAYER™ GARMENTS ENGINEERED FIT™ SERIES

Warrior Wear™ ThermoStatic Base-Layer™ Garments are designed to regulate body temperature, wick moisture, dry quickly, and control odor.

The Engineered-Fit™ series uses material technology that allows you choose between a body-contoured Standard Fit and full Compression Fit simply by size selection. To achieve a Compression Fit, a true next-to-skin, no movement fit which eliminates potential friction related "hot spots" and helps to reduce muscle fatigue, simply select one size down from your normal size.

ThermoStatic Base-Layer Features and Benefits:

- Designed for maximum comfort and freedom of movement
- Size down for a Compression Fit, a true next-to-skin, no movement fit which eliminates potential friction related "hot spots"
- Smooth matte-finish surface to reduce drag and bulk when layering
- Hybrid construction with stretch mesh panels enhances freedom of movement and heat dissipation
- Flat-seam construction and seamless top-of-shoulder helps prevent irritation
- Textured, brushed interior enhances wicking and comfort against the skin
- Durable wicking and anti-microbial odor fighting treatments
- Fast-drying

Mesh Panel Construction:

Mesh panels have been strategically placed on the garment to enhance freedom of movement and heat dissipation.

Flat-Seam Technology:

This method of stitching minimizes irritation in the seam areas.

Moisture Wicking:

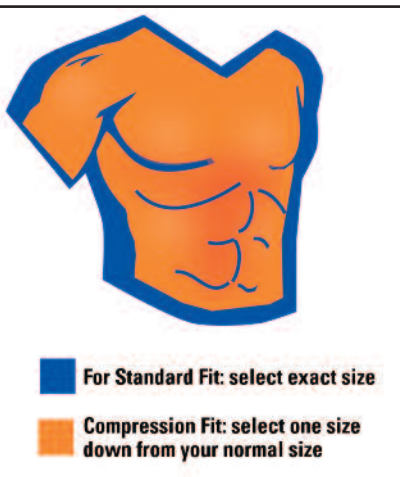

The interior side of the fabric is brushed to break up the fibers which reach out to enhance moisture wicking performance via capillary action, in addition to the moisture-wicking fabric treatment.

Anti-Microbial / Odor Control:

Treated with a durable anti-microbial treatment which inhibits the growth of bacteria, thus preventing odor

Engineered-Fit Technology:

Material technology utilizing the stretch of the fabric allowing you choose between a body-contoured Standard Fit and full Compression Fit simply by size selection.

SIZE SELECTION:

To find your size, look up your measurement in the chart below. As demonstrated in the chart, if your chest measures from 42"-44" and you prefer a body-contoured Standard Fit, choose size Large. If you prefer a full Compression Fit, simply size down to a size Medium.

FITTING CHART (In inches, using chest size for tops and waist size for bottoms)						
SHIRT SIZE	34"-36"	38"-40"	42"-44"	46"-48"	50"-52"	54"-56"

BLACKHAWK!® WARRIOR WEAR™ JACKET SYSTEM

The Warrior Wear Jacket System consists of 3 jackets designed to be used separately or layered in combination with each other depending on the temperature, elements, and the wearer's need for insulation, ventilation, and wind or water resistance. Each layer of the system has a highly sophisticated design using the highest grade performance fabrics and most advanced construction techniques available. Jackets are sold separately only.

UPDATED DESIGN!

TRAINING JAK-LAYER 1

- Lightweight training jacket for moderate warmth while training or in the field
- Excellent protection for aerobic activities, or as a general use jacket in mild conditions
- Water-resistant, windproof, breathable 3-layer laminate with brushed lining
- Durable Water Resistant (DWR) finish to outer fabric surface
- Stretch panels and raglan cut provide lean athletic fit
- YKK® center front zipper with semi-auto locking slider
- Comfortable micro-fleece brushed tricot collar lining
- Zippered chest pocket for storing valuables

ZIPPERED BACK POCKET

SHELL JAK-LAYER 3

- Water and wind proof, breathable 3-layer laminate hard-shell seals out the elements
- Rugged face fabric in high abrasion areas
- 100% waterproof sealed seams throughout entire jacket and hood interior
- YKK® waterproof zipper sealed external pockets
- YKK® waterproof, adjustable pit-zips for ventilation
- Drawstring adjustable waist and bottom hem to keep out elements
- Stow-away hood with extended visor, face opening and crown draw-string adjustments for secure, sealed fit and unrestricted vision
- Hook and loop adjustable cuffs
- Comfortable fleece-lined collar and chin guard
- Waterproof center front storm flaps with dual direction zipper can be opened from top or bottom
- Internal zipper to allow full zip fleece models to be easily zipped in for additional warmth.

SHELL PANT-LAYER 3

The Warrior Wear™ Shell Pant is a waterproof, breathable over-pant designed for use with our 82ES00 Series Shell-Jak to keep you in dry comfort. High performance fabrics, design, and quality construction ensure top performance.

- Water and wind proof, breathable 3-layer laminate shell fabric with sealed seams keeps out the elements
- Rugged face fabric in high-abrasion areas
- Reinforced knees and gusseted crotch
- Elasticized waist with built-in nylon web belt ensures a secure fit
- Zippered openings on legs allow access to pockets on pants worn underneath
- Zippered leg cuffs with hook & loop adjustment open wide for easy donning and doffing and can be closed tightly to seal out the elements
