WE DON'T TEST THE BOUNDS OF REALITY, WE SET THEM.

Oakley's partnership with the U.S. Armed Forces began in the 1980s. The alliance was formed to develop new technologies that improve the safety, performance and comfort of our soldiers. This initiative in research and development continues to produce combat-ready equipment for those whose lives depend on their gear. From the billions spent each year on defense, these are just a few of the dividends.

EYEWEAR TECHNOLOGY

HIGH DEFINITION OPTICS® (HDO®)

Proprietary geometries, high-performance materials and state-of-the-art design and production techniques allow Oakley to create eyewear that maintains optical correction for refractive power, optical clarity and prismatic power. These three classifications are measured by a global standard ANSI Z87.1 for optical performance ratings. Oakley is the gold standard and is best-in-class as evident in Private Pilot magazine's sunglass/optics test results comparing all manufacturers.

OAKLEY HDPOLARIZED

Oakley HDPolarized technology surpasses industry standards for clarity, performance and durability. Common techniques of incorporating polarization films into lenses by lamination (using adhesive to sandwich the film between lens layers) and drop forming (sandwiching then heating and pressing over contoured forms) can cause haziness and optical distortion. Oakley uses an injection-molding process to infuse the lens material around the filter. This liquid fusion creates bonding at the molecular level, allowing the filter to achieve the highest possible level of performance.

HYDROPHOBIC™

Oakley has developed a proprietary Hydrophobic™ lens treatment that repels water, oil, perspiration and dust, and makes cleaning lenses a breeze. Oakley's Hydrophobic™ coating is available in two forms: it comes as a standard permanent lens treatment on certain select models, and also comes in a user applied cleaning and Hydrophobic™ kit.

PHOTOCHROMIC

Oakley lenses are available with photochromic technology to darken and lighten automatically in response to changing light. They help you adapt to changing conditions while filtering out 100% of harmful UV. Not to mention the added visual quality and comfort of having lenses that aren't too dark when the sun pulls a disappearing act, or too light when it knives through the clouds.

AVAILABLE WITH OAKLEY AUTHENTIC PRESCRIPTION LENSES

Oakley can custom build eyewear with prescription lenses exactly to the doctor's orders. Take advantage of the uncompromising quality and innovation of a specialty lab created for Oakley dealers. It's the only way to maintain the integrity and warranty of the Oakley sunglass frame. Numerous lens options are available, including our polarized lens technologies, and all lenses feature the unbeatable clarity of High Definition Optics® (HDO®).

IMPACT PROTECTION

The lens materials and frame geometries of Oakley eyewear provide unsurpassed protection against high-velocity and high-mass impact. For high-velocity impact testing, a quarter-inch steel shot is blasted from a pneumatic cannon at 102 mph. The high-mass impact test uses a metal spike (more than a pound of weight) dropped from over four feet. The unique combination of wrapped, raked-back lens geometries and durable Plutonite lens material allows Oakley eyewear to exceed the standards of these impact tests, established by the American National Standards Institute.

UV PROTECTION

Oakley eyewear provides unbeatable protection against the damaging rays of ultraviolet radiation. Oakley's Plutonite® lens material inherently blocks 100% of all UVA, UVB, UVC and harmful blue light. The protection is formulated into the lens material, as opposed to a thin surface film that can become scratched, leaving dilated pupils exposed to ultraviolet leaks. Shielding has nothing to do with the darkness or color of the lens, so even clear Oakley lenses provide full protection. The wrapped, raked-back architecture of Oakley eyewear provides further protection by blocking UV from the periphery.

PLUTONITE® LENS MATERIAL

Lightweight Plutonite® lens material offers superior comfort, clarity and protection against impact and ultraviolet radiation. Maintaining the proven

IRIDIUM® LENS COATINGS

Oakley Iridium® lens coatings allow the wearer to tune transmission for any light condition. Superheated metallic oxides are fused to the lens at the molecular level, permanently bonding to create a uniform filtering layer that optimizes contrast and minimizes glare. Tuned to transmit from 9 to 92 percent of available light, the coatings are specifically formulated for optimal balance between reflection, transmission and absorption, depending on the targeted environment for usage.

3-POINT FIT

Oakley frames are engineered to maintain a comfortable, secure fit. The company's patented Three-Point Fit ensures that each frame makes contact only at the bridge of the nose and behind the temples. This retains optics in perfect alignment and eliminates the discomfort of ordinary frames that hook the ears and mount with unbalanced pressure points. Some earstems are sheathed in Unobtanium®, an Oakley innovation that actually increases grip with perspiration.

FRAME COMPOSITION

Engineering breakthroughs in structural materials allow Oakley to produce lightweight, high-performance eyewear frames that maintain superior protection and comfort. The polymers in O Matter® frames are formulated for high durability, as well as controlled flexibility for improved safety during impact. To produce the ultra-strong, ultra-lightweight chassis of Oakley Wire frames, five metallic compounds are fused into a single C-5™ alloy. Both frame materials maintain resistance to ultraviolet radiation, humidity, thermal

SI BALLISTIC M FRAME® 2.0 ARRAY

The Oakley SI Ballistic M Frame 2.0 surpasses ANSI Z87.1 Industrial Standards for high-mass and high-velocity impact protection. Additionally the M Frame 2.0 meets MIL SPEC, MIL-PRF-31013. All lenses are made of pure Plutonite®, a proprietary material that offers the highest level of optical clarity available in eyewear. You get razor-sharp clarity at all angles of view, which maximizes peripheral vision and protection against sun, wind and side impact. It also features a clip that holds the lens and frame together providing more secure support.

11-138 SI Ballistic M Frame 2.0 Array, NSN 4240-01-525-3095

USSTANDARDISSUE.COM | 06

SI BALLISTIC M FRAME® 2.0 LASER ARRAY

The Oakley SI Ballistic M Frame 2.0 Laser Array surpasses ANSI Z87.1 Industrial Standards for high-mass and high-velocity impact protection. Additionally the M Frame 2.0 meets MIL SPEC MIL-PRF 31013. All lenses are made of pure Plutonite®, a proprietary material that offers the highest level of optical clarity available in eyewear. It also features a clip that holds the lens and frame together providing more secure support.

- Optical density not less than 4.0 - wavelengths of 820nm to 850 and the wavelength of 1064nm.
- Visible light transmittance: Suitable for medium to low light conditions.
- The optical density measurements are taken at eye centers at an IPD of 64mm.

11-145 SI Ballistic M Frame 2.0 Laser Array NSN 4240-01-555-5324

USSTANDARDISSUE.COM | 07

SI FLAK JACKET®

FLAK JACKET is made of lightweight O MATTER® for all-day comfort. Pure PLUTONITE® lens material filters out 100% of all UV, and FLAK JACKET meets ANSI Z87.1 standards for impact protection. The semi-rimless design means there's no frame rim to block downward view. Optical clarity exceeds all ANSI Z87.1 standards, and HIGH DEFINITION OPTICS® (HDO®) extends razor-sharp vision all the way to the lens periphery. FLAK JACKET is available in two lens shapes: standard size and the larger XLJ. Optional lenses with Oakley HDPOLARIZED block glare while maintaining the best optical clarity on the planet.

11-003 SI Flak Jacket/Black/Grey

11-004 SI Flak Jacket XLJ/Black/Grey

USSTANDARDISSUE.COM | 08 AVAILABLE WITH OAKLEY AUTHENTIC PRESCRIPTION LENSES.

SI HALF JACKET®

Sporting top-half frames coverage, these open-edge design sunglasses are a combination of enhanced style and performance. The open-edge design extends your vertical field of vision, and each set of optional lenses retains the peripheral clarity of HIGH DEFINITION OPTICS® (HDO®). That's just one of the patented innovations that give HIGH DEFINITION OPTICS® (HDO®) its unbeatable performance. Shatterproof and scratch-resistant Plutonite® polycarbonate lenses provide added durability, while meeting all ANSI Z87.1 standards for optical precision and impact resistance.

11-162 Industrial M Frame Black/Grey

11-056 SI M Frame Hybrid/Black/VR28

INDUSTRIAL M FRAME®/SI M FRAME®

The Oakley SI M Frame surpasses ANSI Z87.1 Industrial Standards for high-mass and high-velocity impact protection. Incorporating HIGH DEFINITION OPTICS® (HDO®) technology, lens geometry comes in four interchangeable lens shapes. All lenses are made of pure Plutonite®, a proprietary material that offers the highest level of optical clarity available in eyewear. You get razor-sharp clarity at all angles of view, which maximizes peripheral vision and protection against sun, wind and side impact.

SI STRAIGHT JACKET®

With the STRAIGHT JACKET you get the unbeatable clarity of HIGH DEFINITION OPTICS® (HDO®) for crystal clear vision along the entire lens contour. The optics are so sharp, they exceed all ANSI Z87.1 standards.

Protection also meets ANSI Z87.1 standards for both high-velocity and high-mass impact. The durable, lightweight O MATTER® frame utilizes soft UNOBTAINIUM® components to increase grip with perspiration. It's all part of a Three-Point Fit that holds the lenses in precise optical alignment and offers all-day comfort.

USSTANDARDISSUE.COM | 12 AVAILABLE WITH OAKLEY AUTHENTIC PRESCRIPTION LENSES.

SI MINUTE® 2.0

Our MINUTE eyewear is specifically designed for small to medium size faces, and version 2.0 gives you the comfort, protection and performance of the best eyewear on the planet.

MINUTE 2.0 uses the patented innovations of HIGH DEFINITION OPTICS® (HDO®) to beat all standards of ANSI Z87.1, the industry's yardstick for optical precision. Even the world's best lenses can't perform if they're covered with oily smears and water sheens, so we added a permanent coating called Oakley HYDROPHOBIC™ to repel rain, sweat, skin oils and dust. The pure PLUTONITE® lenses filter out 100% of all UV, not just UVA and UVB. Impact resistance meets all standards of ANSI Z87.1 and the Three-Point Fit uses supple UNOBTAINIUM® components to increase grip with perspiration.

11-009 SI Minute 2.0/Black/Grey

AVAILABLE WITH OAKLEY AUTHENTIC PRESCRIPTION LENSES. USSTANDARDISSUE.COM | 13

SI GASCAN®

HIGH DEFINITION OPTICS® (HDO®) combines patented optics and PLUTONITE® lens material that provides 100% UV filtering and unsurpassed impact protection. Two lenses are cut from the curve of a single lens shield, then mounted in the frame to maintain the original, continuous contour. Lightweight O MATTER® frame material offers premium comfort. Peripheral vision is maximized by HIGH DEFINITION OPTICS® (HDO®), an innovation that maintains visual clarity at all angles of view. Impact protection meets ANSI Z87.1 standards, and our Three-Point Fit retains the lenses in precise optical alignment. True metal icons sign this Oakley original.

11-005 SI Gascan S/Black/Grey

11-122 SI Gascan/Black/Grey Polarized

SI MONSTER DOG™

HIGH DEFINITION OPTICS® (HDO®) combines patented optics and PLUTONITE® lens material that provides 100% UV filtering and unsurpassed impact protection. Durable O MATTER® frame material forms massive fangs around the skull, combining with pure PLUTONITE® lenses to beat ANSI Industrial Standards for impact protection. O Matter frame material not only meets the demands of the field, it exceeds the durability requirements of industrial applications that include chemical exposure and environmental extremes. The lenses wrap around the head to maximize peripheral vision and protection. Patented HIGH DEFINITION OPTICS® (HDO®) maximizes peripheral vision while retaining critical clarity at all angles of view.

05-015 SI Monster Dog/Black/Grey

11-017 SI Monster Pup/Black/Grey Polarized

AVAILABLE WITH OAKLEY AUTHENTIC PRESCRIPTION LENSES. USSTANDARDISSUE.COM | 15

SI FIVES SQUARED™

If ordinary sunglasses just don't fit, FIVES SQUARED is the answer. Unlike conventional sunglasses that stick out at the sides, this frame uses Condensed Cranial Geometry for a tapered architecture that feels as good as it looks and it's a look that soaks sophistication in adrenalin. Our Three-Point Fit maximizes comfort while holding the lenses in precise optical alignment letting the innovations of HIGH DEFINITION OPTICS® (HDO®) do their work. Optical performance and impact protection meet ANSI Z87.1 standards.

11-020 SI Fives Squared/Black/Grey Polarized

USSTANDARDISSUE.COM | 16 AVAILABLE WITH OAKLEY AUTHENTIC PRESCRIPTION LENSES.

SI OAKLEY CANTEEN®

When it comes to technology, they say we're overly aggressive. And because our science and art are inseparable, designs like OAKLEY CANTEEN are anything but restrained. OAKLEY CANTEEN™ utilizes HIGH DEFINITION OPTICS® (HDO®) for unbeatable performance and PLUTONITE® lenses for 100% UV filtering. The comfortably lightweight design is rendered from durable O MATTER® frame material, enhanced with dual cam hinges, and optimized with UNOBTAINIUM® components that increase grip with perspiration. It even meets all ANSI Z87.1 standards for optical precision and impact resistance.

11-016 SI Canteen/Black/Warm Grey

AVAILABLE WITH OAKLEY AUTHENTIC PRESCRIPTION LENSES. USSTANDARDISSUE.COM | 17

SI BOTTLECAP®/ SQUARE WIRE®

Square Wire

The latest evolution of an Oakley favorite, it features our coveted HIGH DEFINITION OPTICS® (HDO®) for unbeatable clarity and protection. Lightweight C-5™ alloy is the reason why it feels comfortable all day. Temple sleeves of soft UNOBTAINIUM® increase grip with sweat while spring hinges balance the fit. The Square Wire meets all ANSI Z87.1 standards for optical performance and impact resistance.

Bottlecap

HIGH DEFINITION OPTICS® (HDO®) combines patented optics and PLUTONITE® lens material that provides 100% UV filtering and unsurpassed impact protection. An open-edge design of lightweight O MATTER® frame material, BOTTLECAP offers an unobstructed field of downward view. Offering a comfortable fit on all facial sizes, BOTTLECAP is especially well suited for small to medium-size faces, due to contouring that eliminates the wide corners of conventional frames. This durable optical instrument also provides 100% UV filtering and impact protection that meets all ANSI Z87.1 standards.

SI GASCAN® WITH U.S. FLAG ICONS

The SI Gascan with U.S. flag Icons is an exclusive U.S. Standard Issue product that features a unique special edition Oakley American flag "O" logo. This exclusive American government inspired Gascan offers HIGH DEFINITION OPTICS® (HDO®), which combines patented optics and PLUTONITE® lens material that provides 100% UV filtering and unsurpassed impact protection. A lightweight O MATTER® frame material offers premium comfort, and peripheral vision is maximized by HIGH DEFINITION OPTICS® (HDO®), an innovation that maintains visual clarity at all angles of view. Impact protection meets ANSI Z87.1 standards, and our Three-Point Fit retains the lenses in precise optical alignment.

SI BALLISTIC M FRAME®

The Oakley SI Ballistic M Frame 2.0 surpasses ANSI Z87.1 Industrial Standards for high-mass and high-velocity impact protection. The M Frame 2.0 additionally meets MIL SPEC MIL-PRF 31013. All lenses are made of pure Plutonite®, a proprietary material that offers the highest level of optical clarity available in eyewear. Photochromic lens automatically darkens and lightens the response to the environment while providing 100% UV protection. It also features a clip that holds the lens and frame together providing more secure support.

Inactivated: 89% Protection Index: 0
Activated: 24% Protection Index: 2

SI HALF JACKET® XLJ WITH TRANSITIONS® SOLFX™

Armed with Transitions® SOLFX™, this field gear adapts to virtually any environment. The lenses darken and lighten automatically but retain their base color, even in low light. The XLJ version of Half Jacket® offers extended lens coverage for larger faces or for those who prefer an expanded field of view. Like the included lenses, all optional interchangeable lenses come with the innovations of High Definition Optics® (HDO®) including patented XYZ Optics® to maintain clarity at all angles of vision. This optical equipment passes ANSI Industrial Standard Z87.1 for clarity, high-mass impact and high-velocity impact.

- Transitions® SOLFX™ photochromic lens technology that darkens and lightens automatically
- Fully interchangeable lens design for rapid adaptation to environmental conditions
- High strength-to-weight ratio of O Matter® frame material for optimized durability and comfort
- Plutonite® lens material to filter out 100% of all UVA, UVB, UVC and harmful blue light up to 400nm
- Unobtainium® components that increase grip with sweat, maintain a comfortable fit and provide a secure grasp during lens changing

SI BALLISTIC GOGGLE/SI BALLISTIC GOGGLE LASER ARRAY

The SI Ballistic Goggle is designed to present the best Oakley has to offer in protection, optical performance, and comfort. The SI Ballistic goggle is fully compliant with the ANSI Z87.1 – 2003 for both protection (high mass/velocity impact and penetration) and optical performance requirements as well as MIL V-43511C, Clause 3.5.10 impact standards. The SI Ballistic goggle lenses are made from Oakley's high purity, optical grade polycarbonate, Plutonite® (blocks 100% UVA, UVB, and UVC light). The SI Ballistic Goggle is equipped with a micro-fleece face-foam liner to provide a secure and comfortable fit for all sized heads. Fully compatible with MICH, ACH, CVC, AND PASGT helmets.

- Optical density not less than 4.0 - wavelengths of 820nm to 850 and the wavelength of 1064nm.
- Visible light transmittance: Suitable for medium to low light conditions.
- The optical density measurements are taken at eye centers at an IPD of 64mm.

SI A-FRAME® GOGGLE

The Oakley SI Assault A-Frame Military Goggle is the ultimate in protection. Many personnel still have both eyes today because their Oakley eyewear stopped a fragment from an IED or RPG. The SI ASSAULT Goggle is made for operators and soldiers and are specifically designed to be worn with U.S. Military type helmets.

- Lightweight chassis of flexible urethane provides an adaptable fit with full durability
- Low-profile lens geometry offers a wide peripheral view
- Anti-fogging treatment helps maintain a clear field of view
- Ram-air surge ports provide ventilation that further reduces fogging
- Plutonite® shield blocks 100% of all UVA, UVB, UVC and harmful blue light
- High-mass and high-velocity impact protection exceeds ANSI Industrial Standards
- Available with a Clear lens for low light or VR28® to boost contrast in haze
- Made in USA

FRAME AND LENS CONFIGURATIONS

SI BALLISTIC FAN GOGGLE

Rotating 250 times each second, a miniature fan pumps cooling airflow through this optically tuned shield that defends against the airborne assault of sand and wind.

- 15,000 rpm fan pumps 864 cubic inches of cooling air every minute
- Ultra low noise signature maintains stealth
- Hermetically sealed power unit provides 32 hours of runtime with one L91 AA battery
- Closed-cell face foam provides sweat control
- Low-profile geometry with lateral curvature maximizes the field of view
- Anti-fogging treatment helps maintain a clear field of vision
- Plutonite® shield blocks 100% of all UVA, UVB, UVC and harmful blue light
- High-mass and high-velocity impact protection exceeds ANSI Industrial Standards Z87.1
- MIL V-435IIC

FOOTWEAR

This military hardware was developed for the U.S. Elite Special Forces. Part of Oakley's fifteen-year alliance with the United States Military, the innovations behind these designs exceed the combat performance profile for durability, comfort and protection.

- Lightweight, athletically-inspired design for unencumbered performance
- Over-the-ankle boot shaft and low-profile lacing for jump readiness
- Soft temper for optimal comfort and stealth noise signature
- 8" boots meets uniform standard AR 670-1
- Comprehensive moisture control
- Durable top-grain leather
- Fire retardant laces
- All-terrain traction
- Vibram® outsole
- Made in USA

11095-889A SI Temperate Weather Assault Boot 8"

11092-889A SI Hot Weather Assault Boot 6"

11093-889A SI Hot Weather Assault Boot 8"

SI Assault Boot

Offering unencumbered performance and agility, this lightweight design is enhanced with the comfort of prime urethane shock absorption and the climate control of a moisture wicking liner. The vulcanized rubber sole includes directional lug geometry and provides wet/dry traction on smooth and rough terrain. Abrasion resistance allows for fast rope work while an over-the-ankle boot shaft makes it jump ready. Athletically inspired, this boot is engineered with load bearing stability, low-friction lining with anti-microbial treatment and a comfortably soft and quiet temper for stealth.

SI Gatling 8"

Ready for a 20-mile hike through unforgiving terrain, this footwear is made with full-grain leather in a soft temper for optimum comfort and durability. Its prime urethane shock absorption includes anatomical curvature for biomechanical support. With the abrasion-resistant rubber outsole and its directional lugs, you'll have slip resistance on surfaces that range from smooth and wet to rough and dry, and we engineered this boot for optimized load-bearing stability. The gusseted tongue prevents water and debris from entering, so no territory is too hostile.

PACKS/HATS

Icon Backpack 2.0

A triple buckle closure keeps your field gear in check, and we created a special compartment for your laptop (up to 15"). The adjustable sternum strap ensures comfort for the long haul. Convenience features include a webbed exterior pocket plus side pockets with zip closures. Built with riveted reinforcement, this pack earns our true metal icon set in injection-molded PVC. (Dimensions: 21" H x 17" W x 9" D)

Panel Pack

You need comfort for the endless march, and convenience for the chaos of travel. This pack comes with breathable mesh backing, adjustable shoulder straps with foam padding, and a full array of storage features. You get side pockets with angled zips, a secure rear compartment pocket, a pocket with a headphone port for your media player, a sleeve pocket for your handheld electronic items, a key ring clip, and even a pocket sleeve for your phone. (Dimensions: 19" H x 14" W x 8" D)

New Khaki

SI Computer Bag

This durable nylon design stows your laptop (up to 17" widescreen) in a padded sleeve so it's ready for the war zone you call daily life. Adjustable side compression straps help keep the profile lean. Stash your accessories in the multiple pockets and use the custom D-rings for external attachments. The storage compartment is outfitted with organizer pockets and a two-way zip closure. (Dimensions: 14" H x 17" W x 5" D)

Heavy Payload Duffel

Duffels have been standard issue in the military for many decades, and we gave this one the Oakley treatment. It comes with a full 2,500 cubic inch capacity and a removable shoulder strap with non-slip padding. Durability gets heavy duty with 1680D polyester fabric, and we rubberized the bottom. Storage features include end pockets, front/back pockets and a pocket on one end for your shoes. (Dimensions: 22" L X 10" W X 11" D)

Silcon O Cap

The sonically welded logo on the front and back puts this cap in the ranks of performance and style. It's a polyester stretch-fit design with mesh and eyelet venting to help keep you cool. The moisture-wicking sweatband is custom Oakley engineering, and for additional moisture transport, we gave this cap mesh lining.
